Запретить нельзя, использовать **необходимый функционал**

A promotional graphic for VMware Workspace ONE. In the center is a white circle containing the 'WORKSPACE ONE' logo (with 'ONE' in a larger font) and a small image of the Workspace ONE user interface on a laptop and tablet. To the left of the circle is a woman with curly hair, and to the right is a man in a light blue shirt. Below the woman is a green arrow-shaped banner with the word 'Необходимое' (Necessary) in white. Below the man is a blue arrow-shaped banner with the word 'Полезное' (Useful) in white. The background is a light blue gradient with a diagonal line.

Управление устройствами в образовательном учреждении

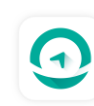

Преподаватели

Устройства учащихся

8.00 – 14.30

Доставка на устройства

- Электронные учебники
- Необходимые приложения (калькулятор, электронная линейка, транспорт, конвертер величин и др.)
- Электронный пропуск ученика
- Антивирус и применение умных политик по безопасности.
- Расписания занятий и факультативов
- Оповещения о событиях в школе

Реализованные проекты в транспортной отрасли

Безопасность данных на устройствах кондукторов

Построение оптимального маршрута - геолокация

организация доступа до корп приложения для полевых Сотрудников (Дорожно-транспортный надзор)

Снижение веса/груза – цифровизация документации

Снижение веса/груза – цифровизация документации

Повышение уровня безопасности компании

Организация эл подписи – обратной связи

Удаленная помощь сотрудникам

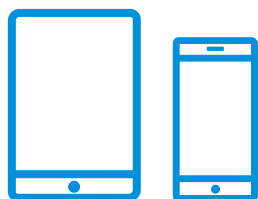

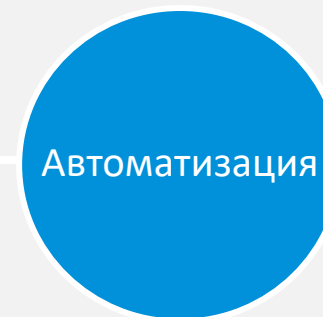

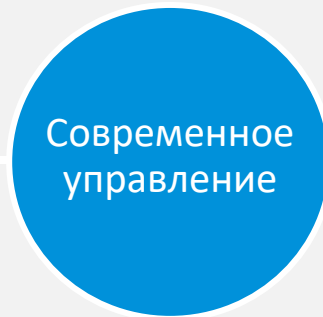

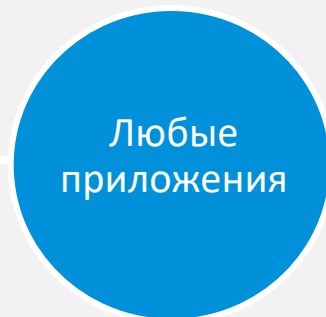

Минимизация времени выхода новых приложений

Workspace One UEM

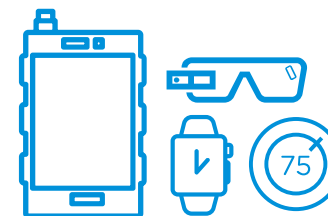

Любые приложения, любое облако/вычислительный центр, любое устройство, любой тип сотрудника

iOS / Android

WIN 10 / MAC / Chromebook /
Linux (VDI)

Rugged / Прочие
устройства

Возможная условия применения системы

VMware Horizon Control Plane

Leverage cloud services for management of private or public cloud deployments

Leverage cloud-native management services to optimize on-premises and cloud deployments

Get access to latest innovations and tools without manual upgrades

Efficiencies for Cross-cloud and Cross-pod management

High-level architecture

Horizon Cloud on Microsoft Azure

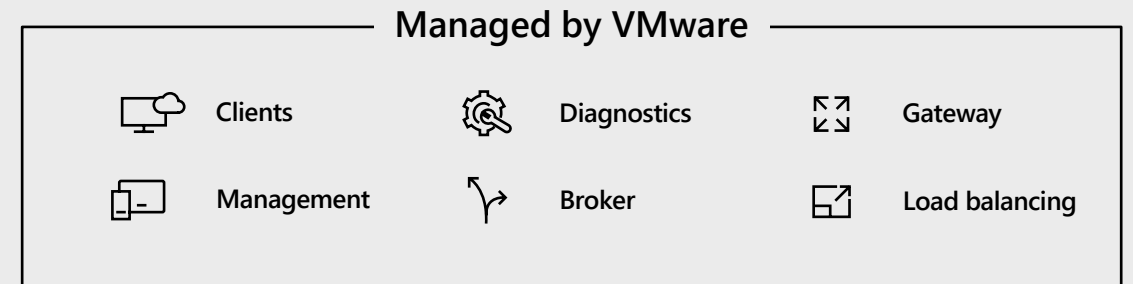

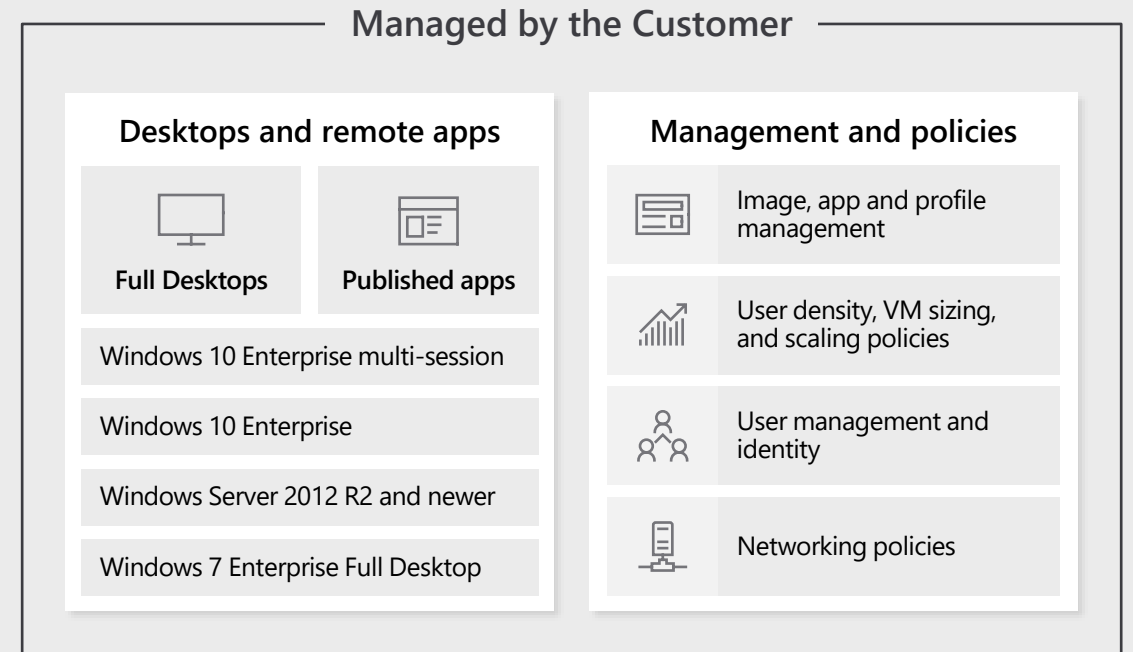

Provides desktop virtualization infrastructure as a managed service in customer's Azure subscription

Deploy and manage virtual machines in customer's Azure subscription

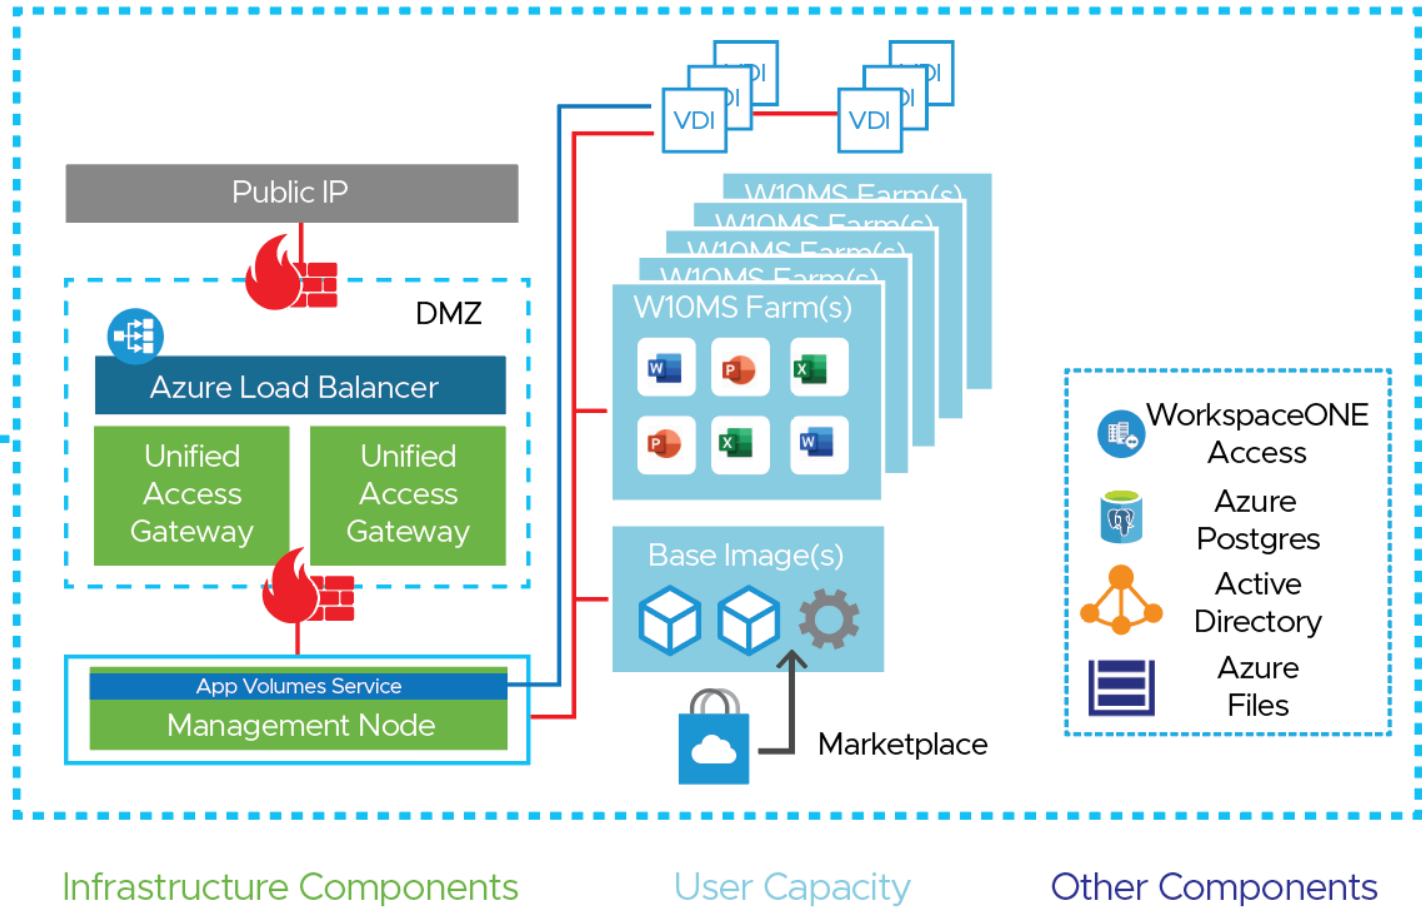

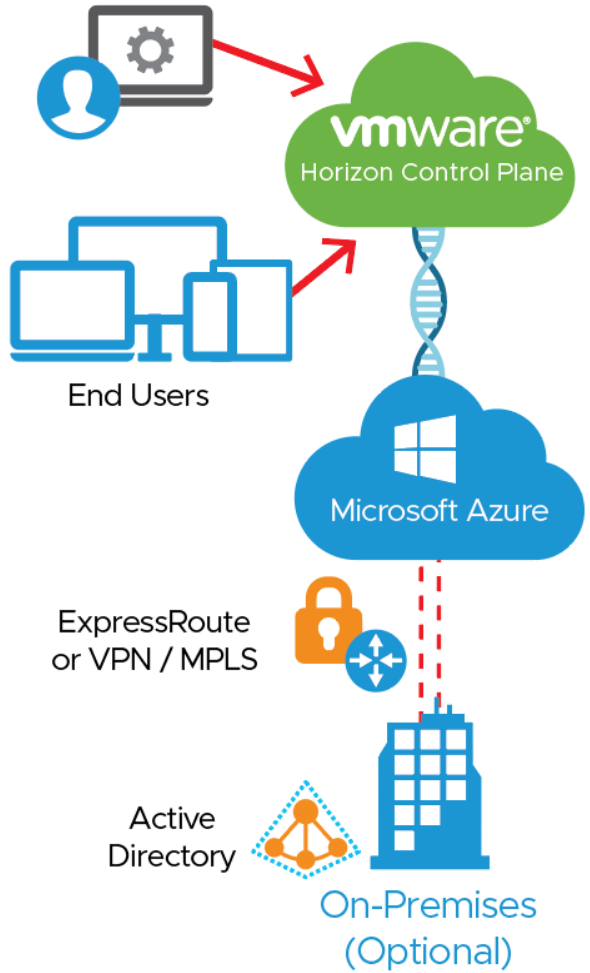

Leverages customer's Azure Virtual Desktop benefit

Integrates with Horizon Control Plane, which includes:

- Hybrid support so admins can manage on-premises and cloud environments from one pane of glass
- Monitoring & Help desk capabilities
- Advanced application and user environment management with VMware App Volumes and Dynamic Environment Manager
- Cloud-based Universal Broker that routes users to any workload regardless of location

System Admin
(Using Horizon Cloud Administrative Console)

Leverage Cloud Management Services

Horizon Universal: Multi-cloud Deployments

Horizon Control Plane

Universal Brokering

- Removes GSLB requirements and complexity
- Reduces network traffic and eliminates hair-pinning
- Enhances user experience with one-site URL

Image Management

- Reduces time and cost spent managing images by automating replication & distribution process
- Mitigates risk with central tracking of image version, updates, rollbacks, and history

Application Management

- Automated application packaging built-in with no additional infrastructure (Azure only)
- Supports portability of packages across on-prem and cloud

Monitoring

- Monitors across multi-pod and multi-cloud deployments
- Consolidates Help Desk functionality across pods to reduce time to resolution

Additional capabilities for Horizon on-premises environments

VMware Horizon – the modern platform for secure VDI and app delivery

Hybrid Support

Efficiently deploy and easily scale virtual desktops and apps across private and public clouds, managed from a single control plane

Simplified Management

Rapidly provision full-featured, personalized virtual desktops and apps with Instant Clone technology and simplify Day 2 management of images, apps, profiles, and policies to save time and reduce costs

End-to-End Security

Secure delivery of virtual desktops and apps that protects your network and datacenter, powered with intrinsic security built into your VMware infrastructure

Trusted Digital Foundation

Leverage VMware's virtualization heritage, SDDC and digital workspace leadership for unique Horizon management, security, and user experience benefits

User Experience

Extend the best digital workspace experience to all apps and use cases, including remote, GPU, collaboration, and more
