Hexagon Safety, Infrastructure & Geospatial

Profit Day Smart City
Almaty, Sep 15, 2023

- Кто Hexagon?
- Что это ЦДГ?
- Зачем он нужен?

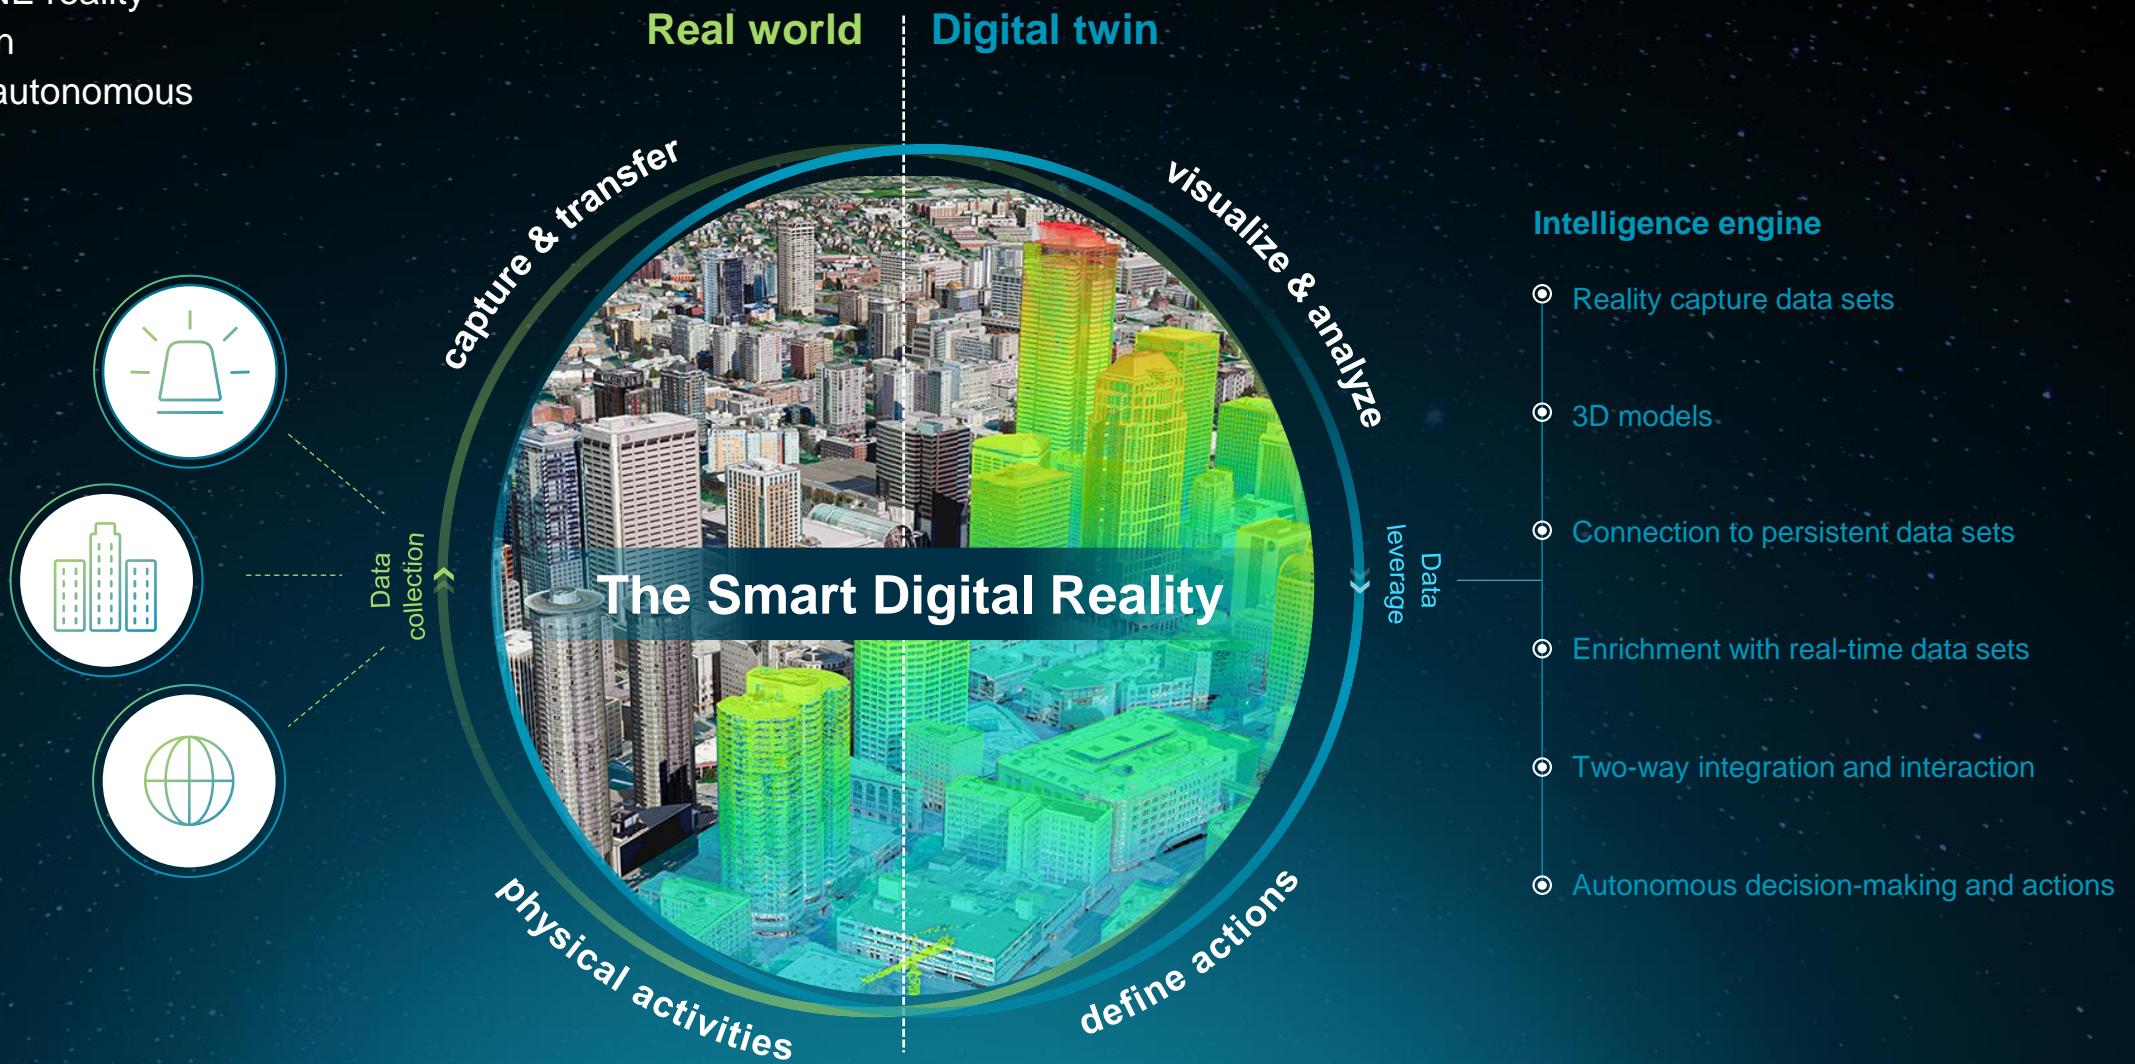

The Smart Digital Reality

Two worlds, ONE reality

Workflow-driven

Real time and autonomous

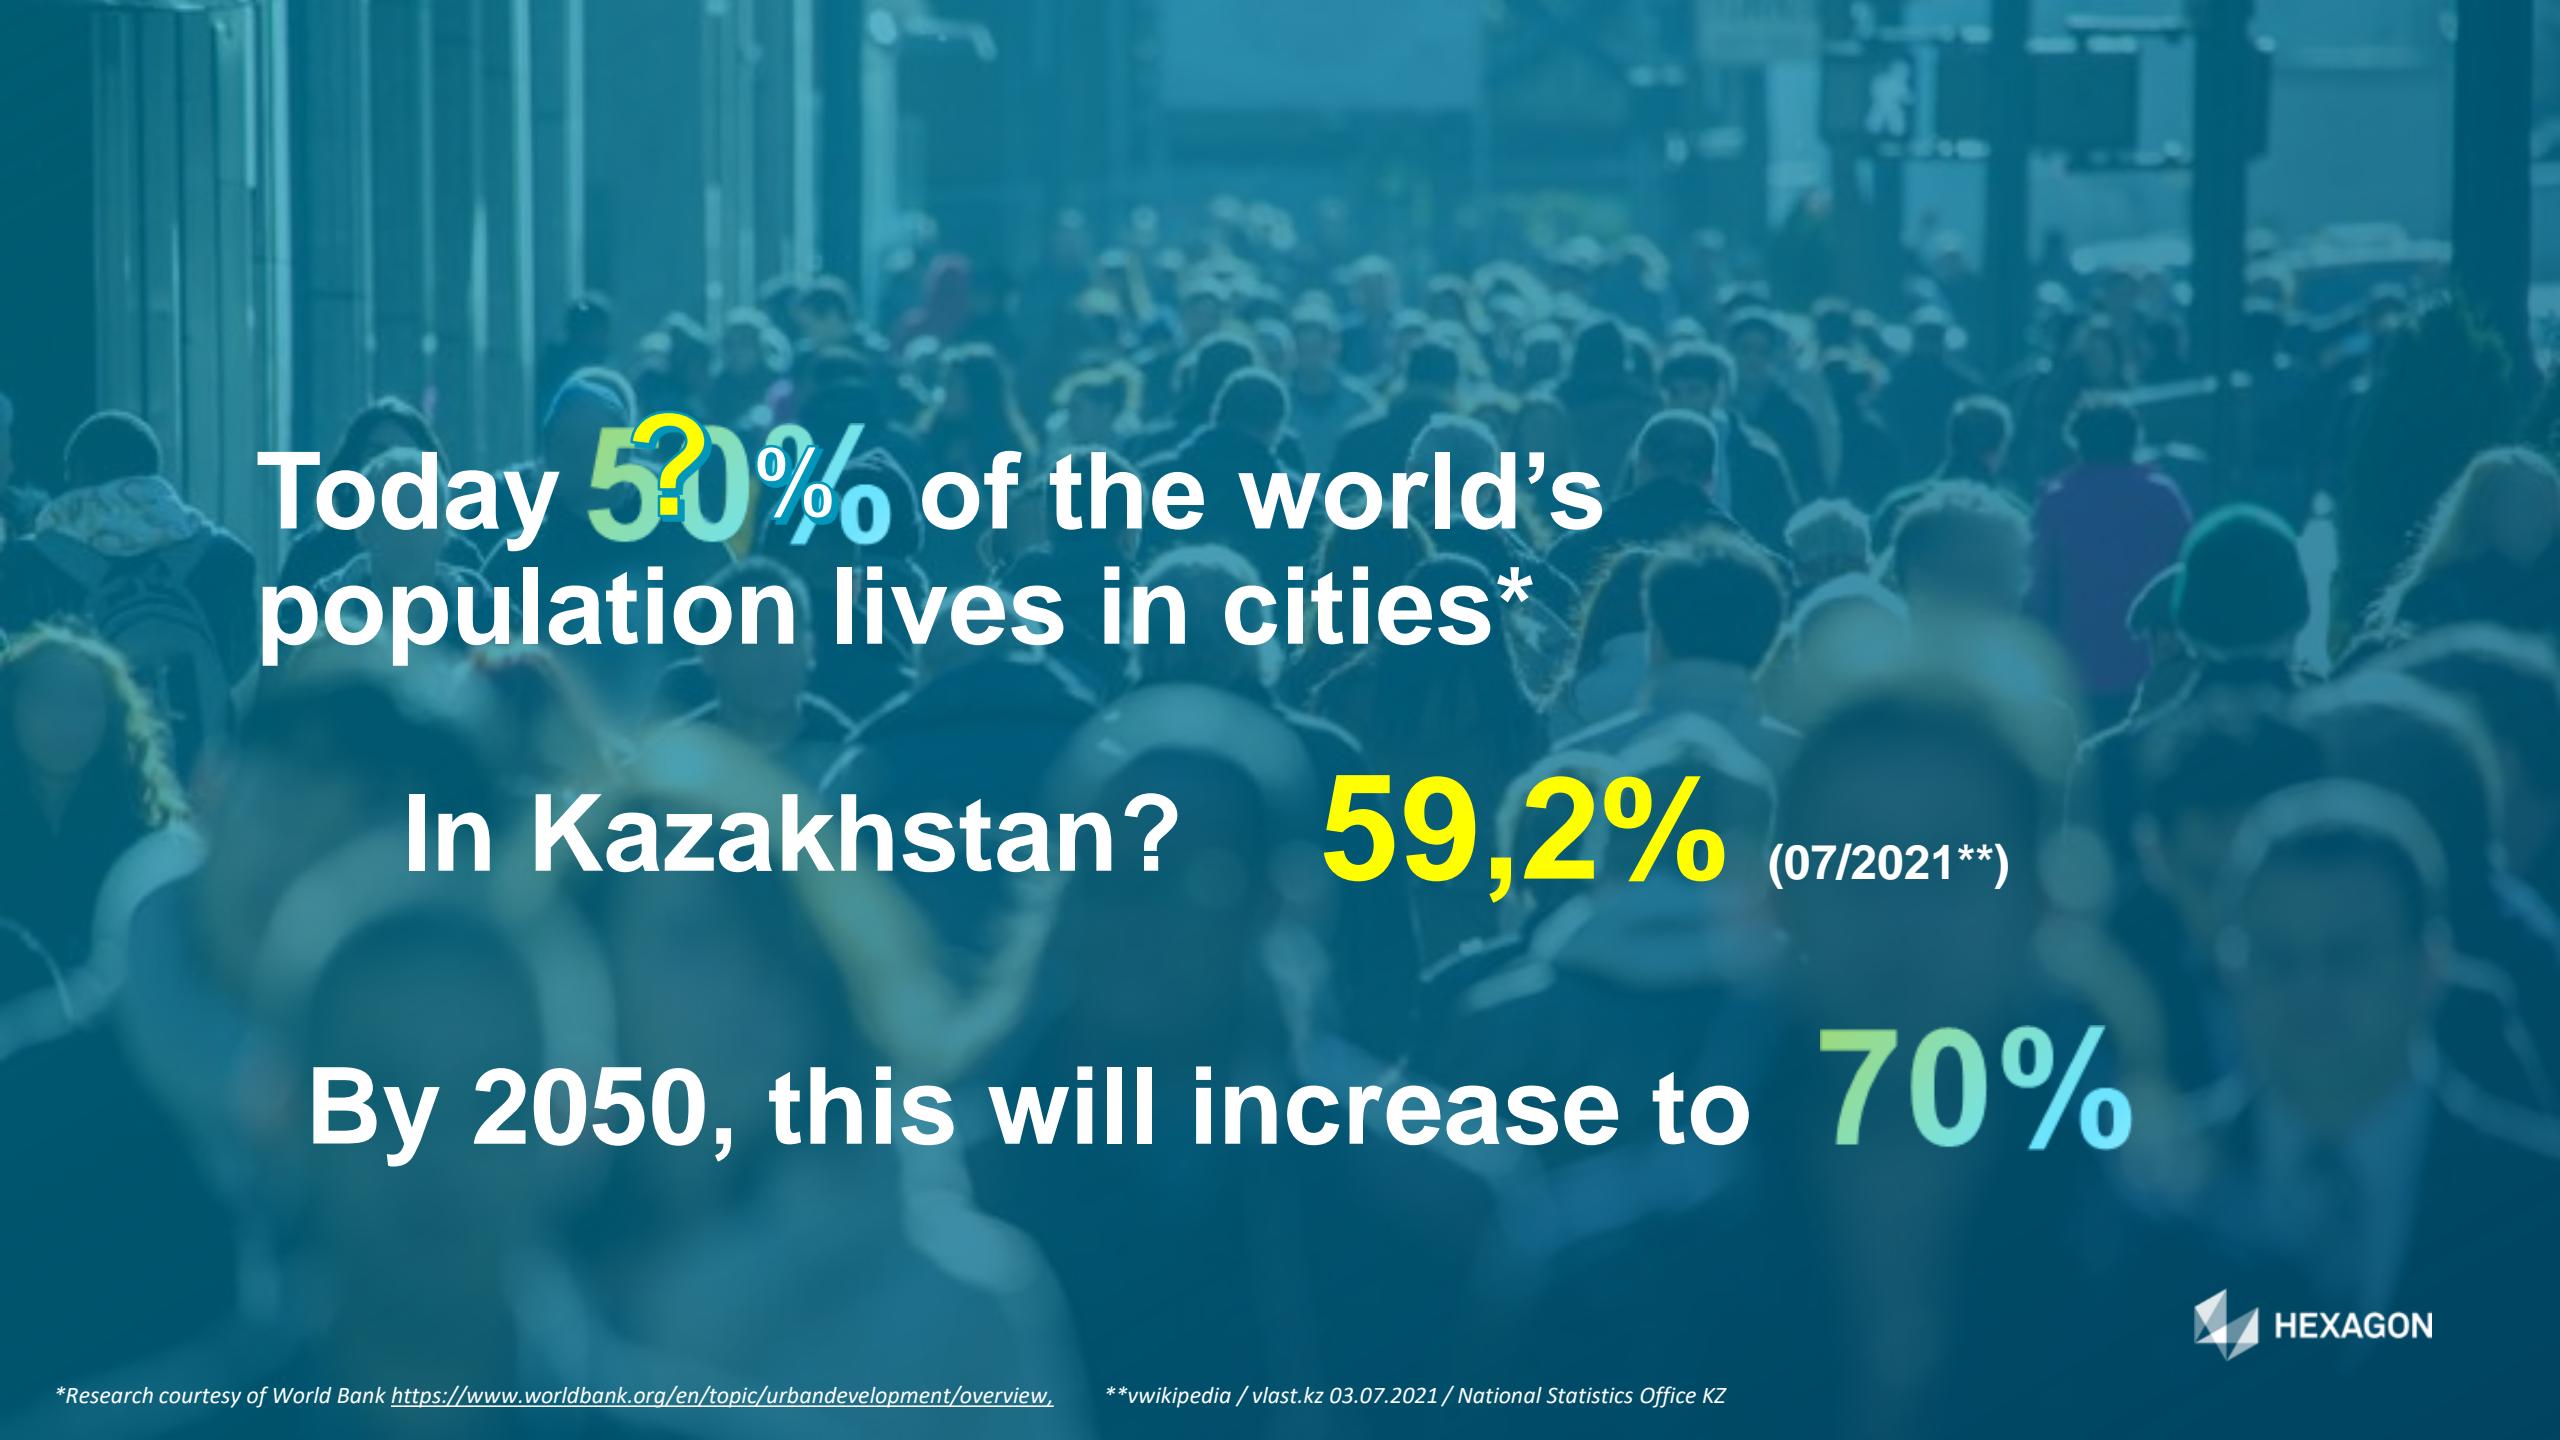

HEXAGON

Urban digital twin

Beyond the buzzword

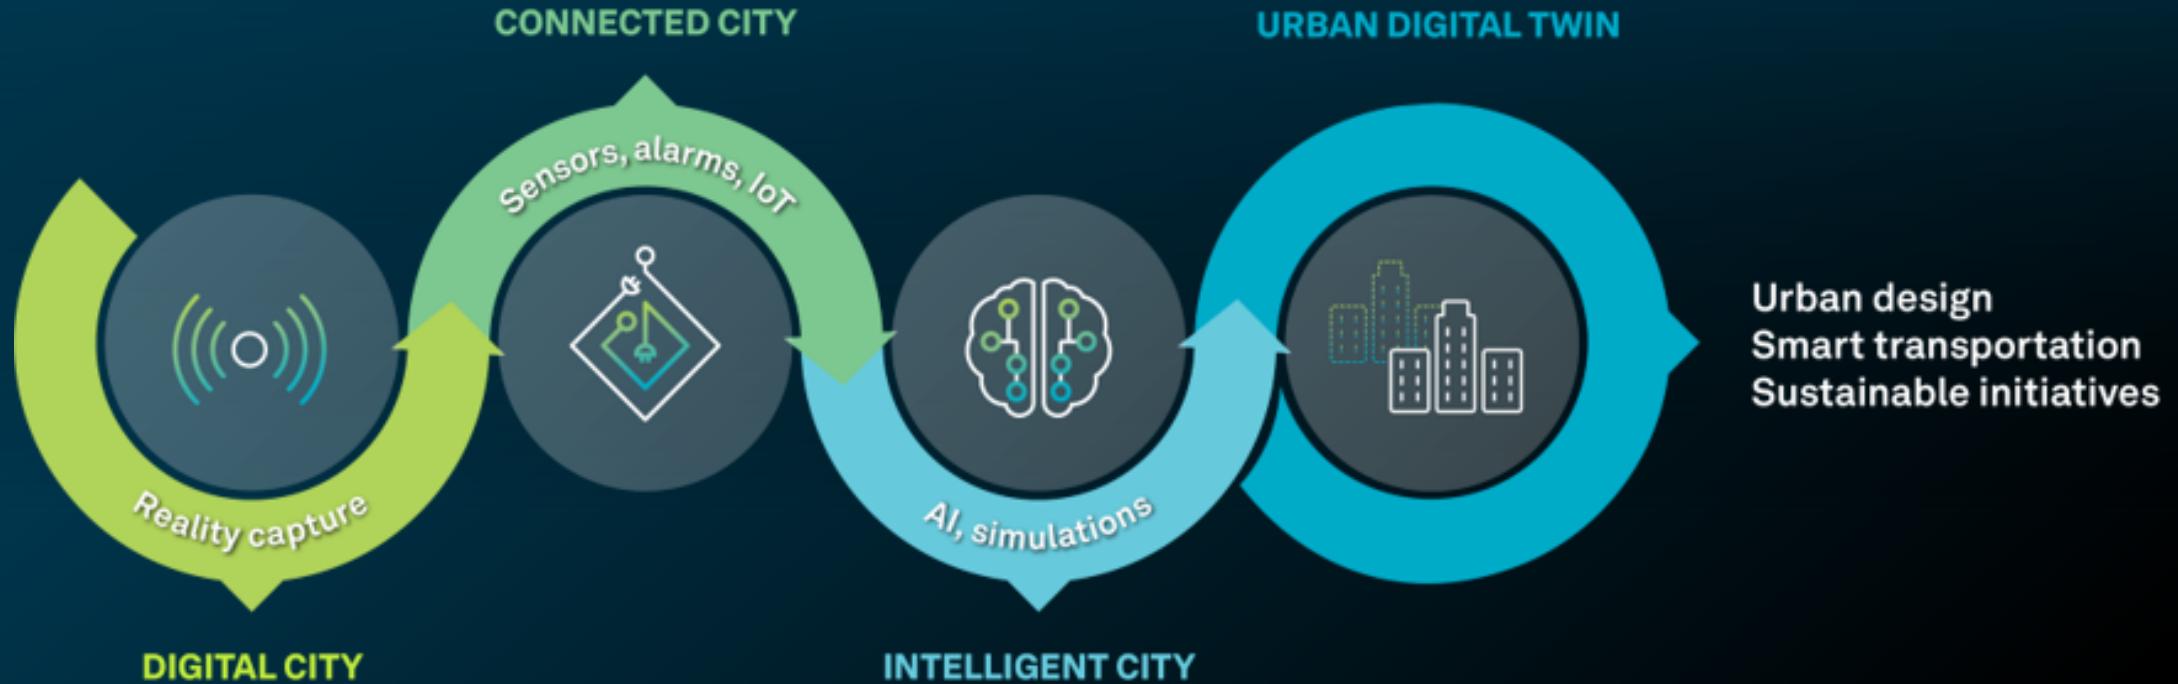

Today **50%** of the world's population lives in cities*

In Kazakhstan? **59,2%** (07/2021**)

By 2050, this will increase to **70%**

Hexagon's urban digital twin

Use cases

The choice is yours: Use independently or all together

Urban design

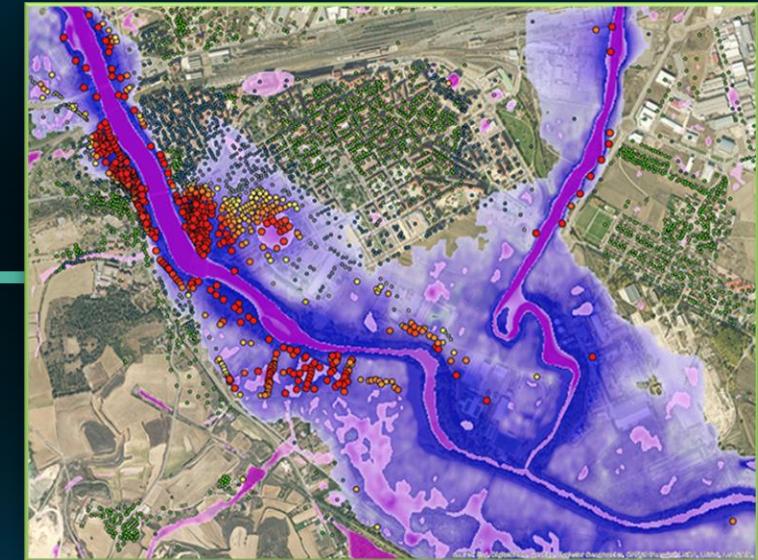

Urban planning

- See the impact of a new building immediately
- Engage the public more easily

Infrastructure monitoring

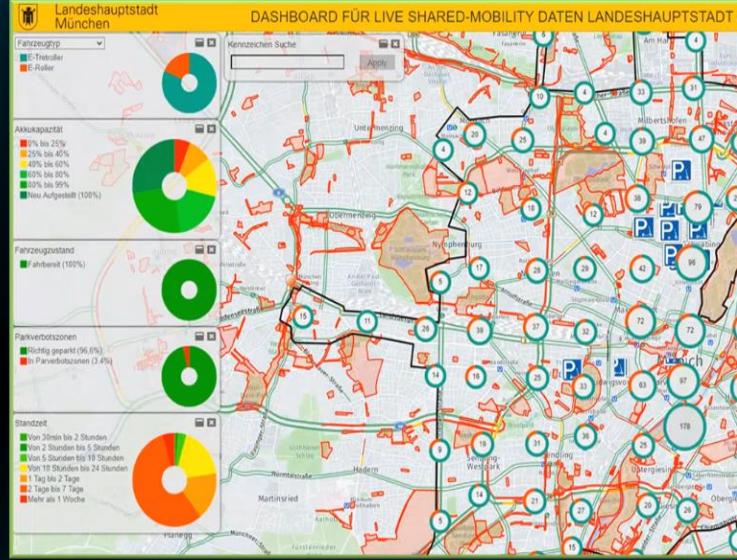

- Detect infrastructure failure before it causes a disaster
- Prioritize inspection and maintenance activities

Flood prevention

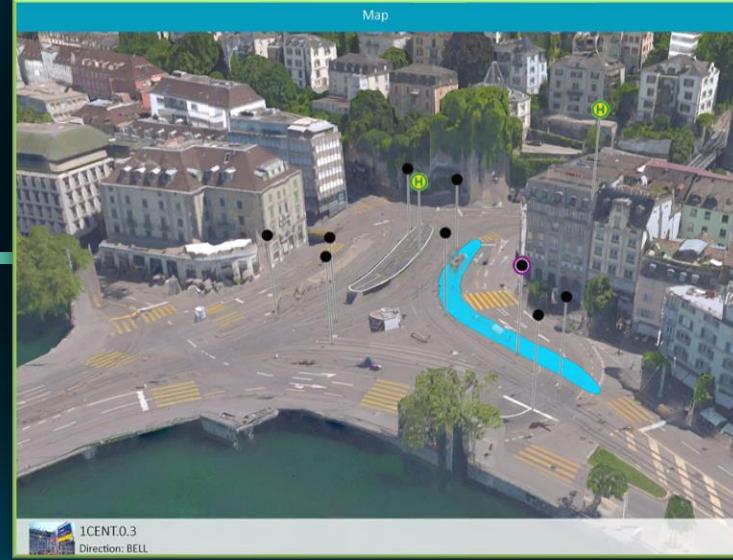

- Determine flood-prone areas with sensor data
- Identify buildings at risk and their insurance values

Smart transportation

Mobility

- Track, visualize and analyze IoT data from mobility providers
- Identify and understand transportation patterns to improve policies

Public transportation

- Combine asset and spatial data to access accurate information
- Increase efficiency and safety for workers, passengers and the environment

Sustainability initiatives

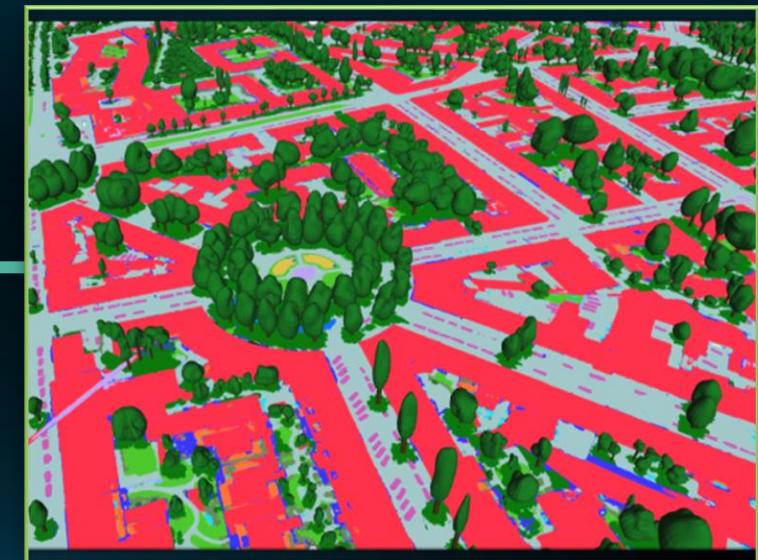

Renewable energy

- Identify areas that receive sufficient sunlight
- Estimate how much energy solar panels could generate

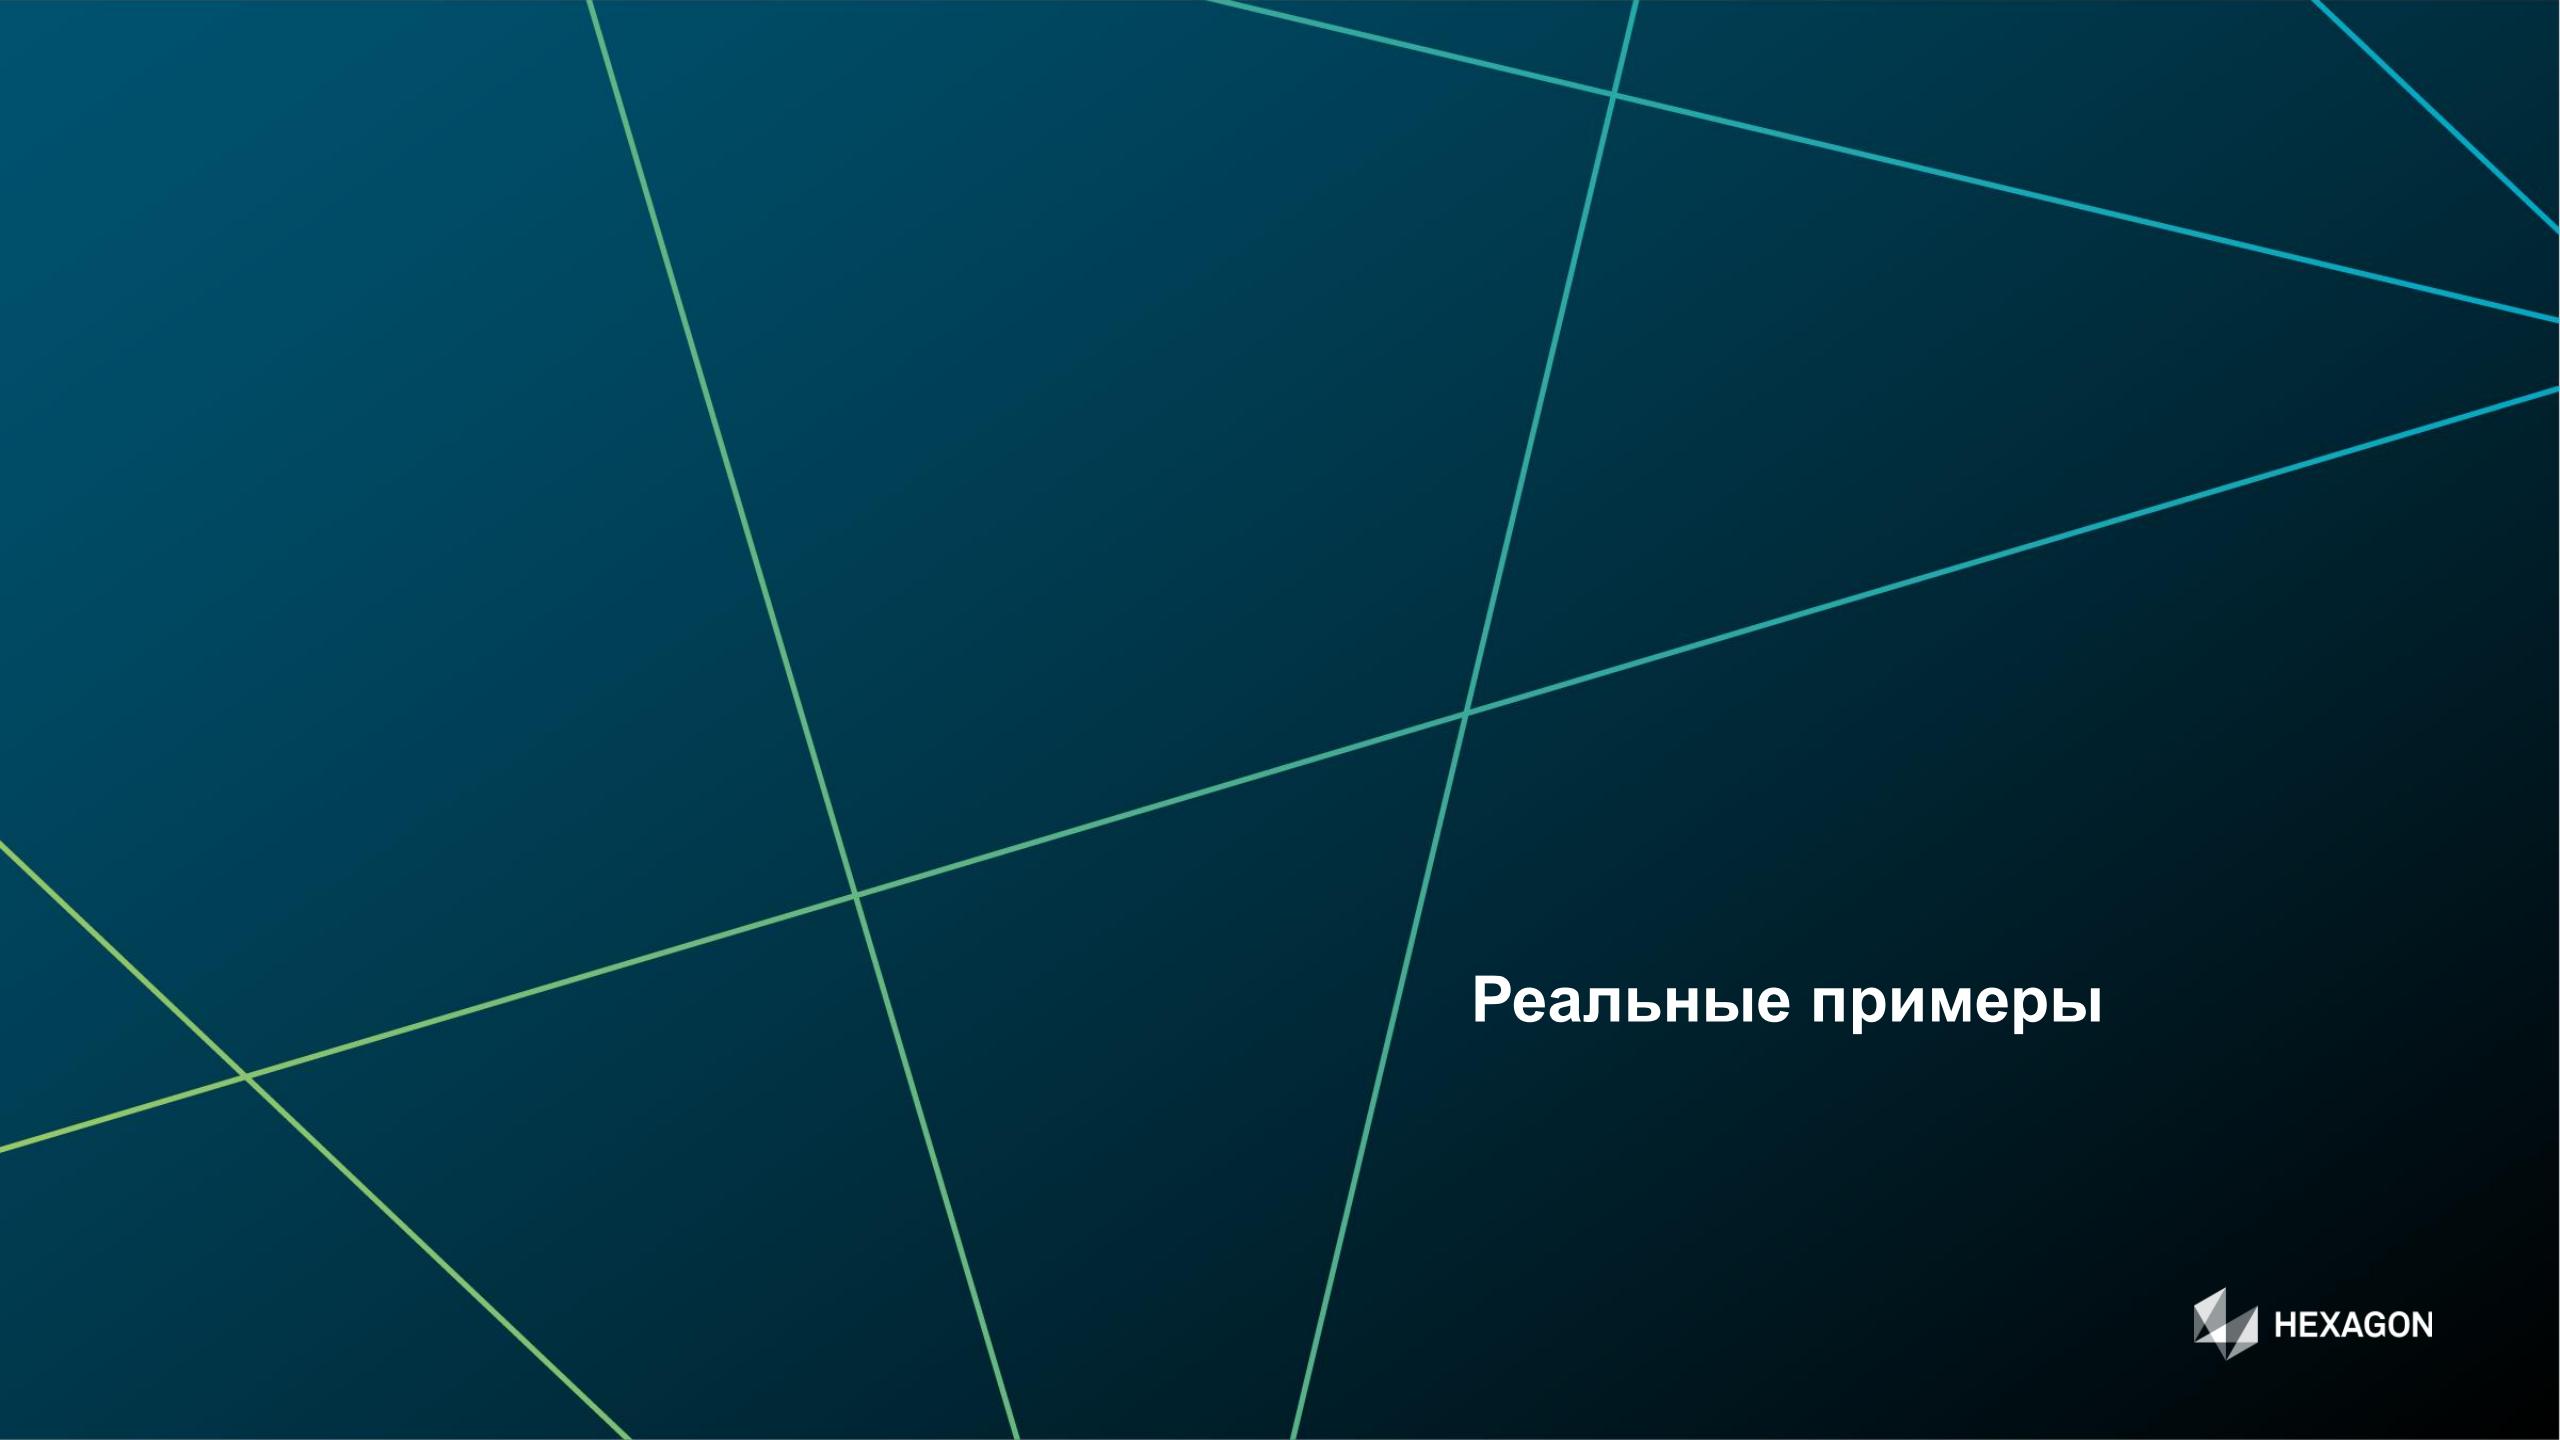

Pollution reduction

- Discover pollution hotspots with sensor data
- Evaluate the effectiveness of specific measures

Greening cities

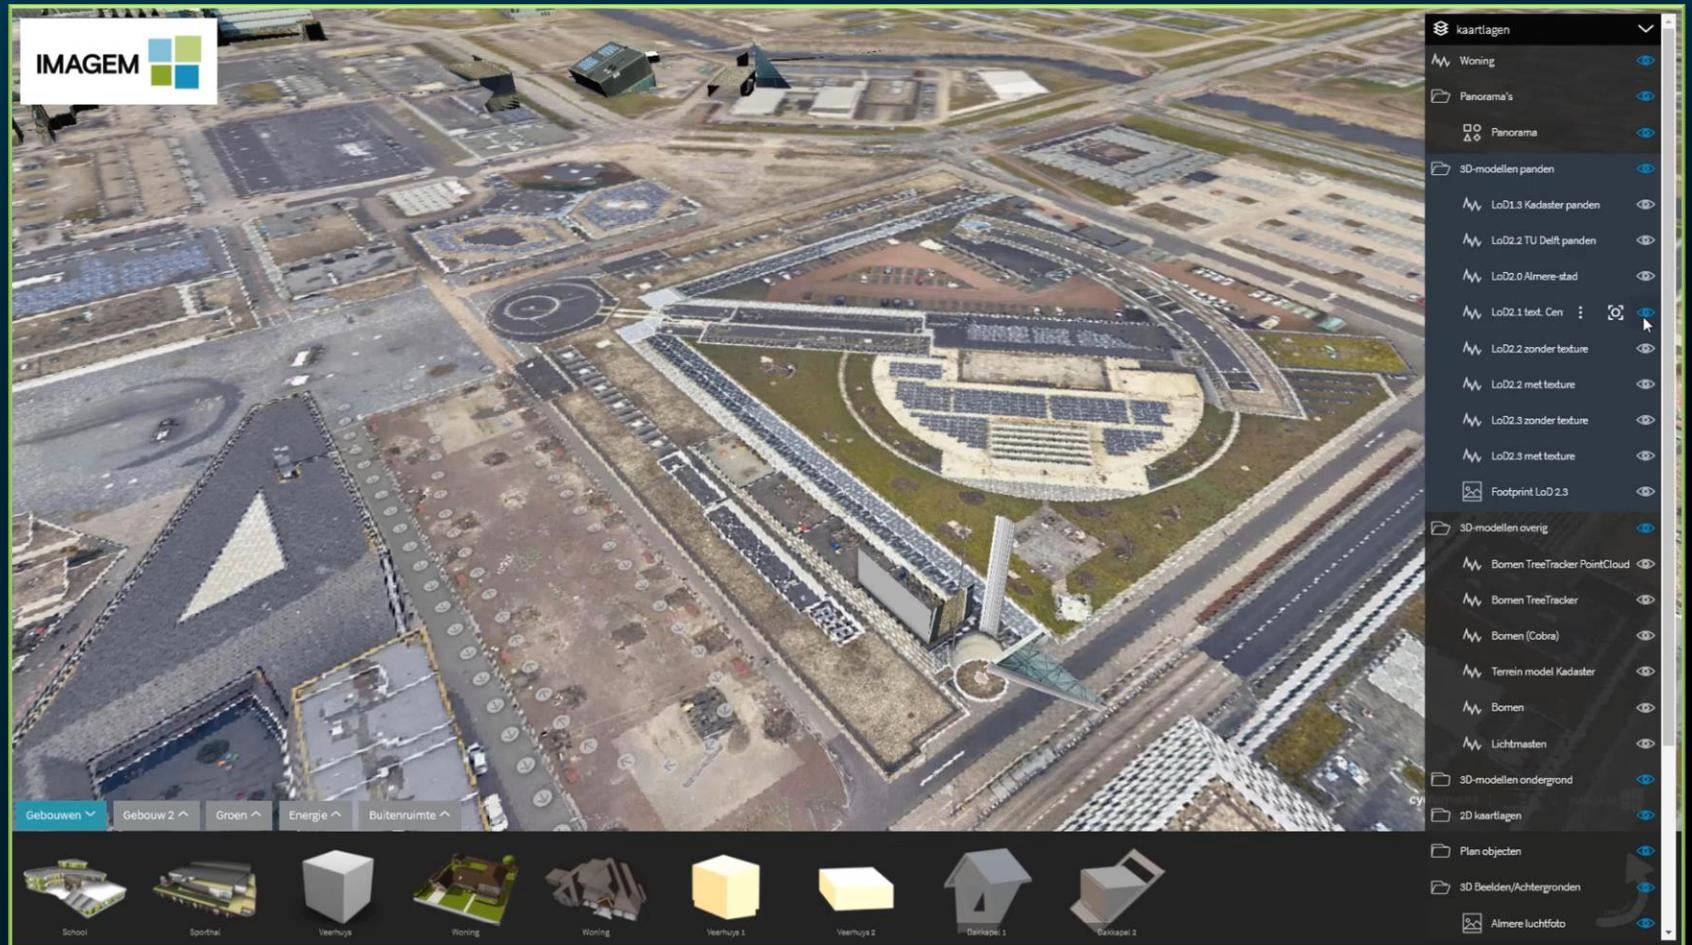

- Predict heat islands
- Simulate cooling interventions
