

# Tanzu Portfolio

Mariia Bocharova

VMware Solution Engineer

June 2023

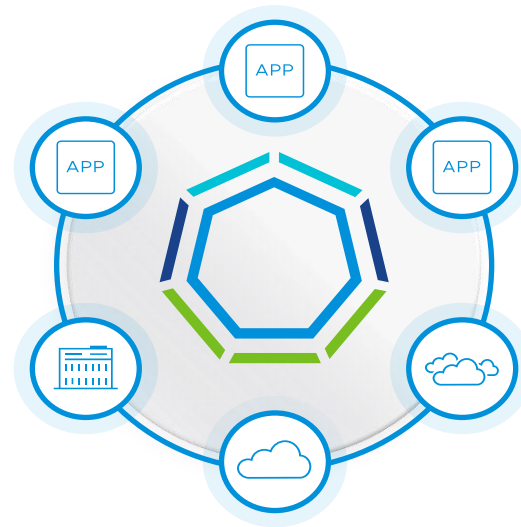

# VMware Tanzu Multi-Cloud, Modern Apps Platform

## VMware Tanzu<sup>®</sup> Developer and App Platform<sup>™</sup>

Application aware platform that provides development teams a pre-paved path to production to get code running on ANY Kubernetes in a multi-cloud environment

## VMware Tanzu<sup>®</sup> Data Services

Streamlined portfolio of on-demand caching, messaging, and database software for development teams to build modern applications

## VMware Tanzu<sup>®</sup> for Kubernetes Platform

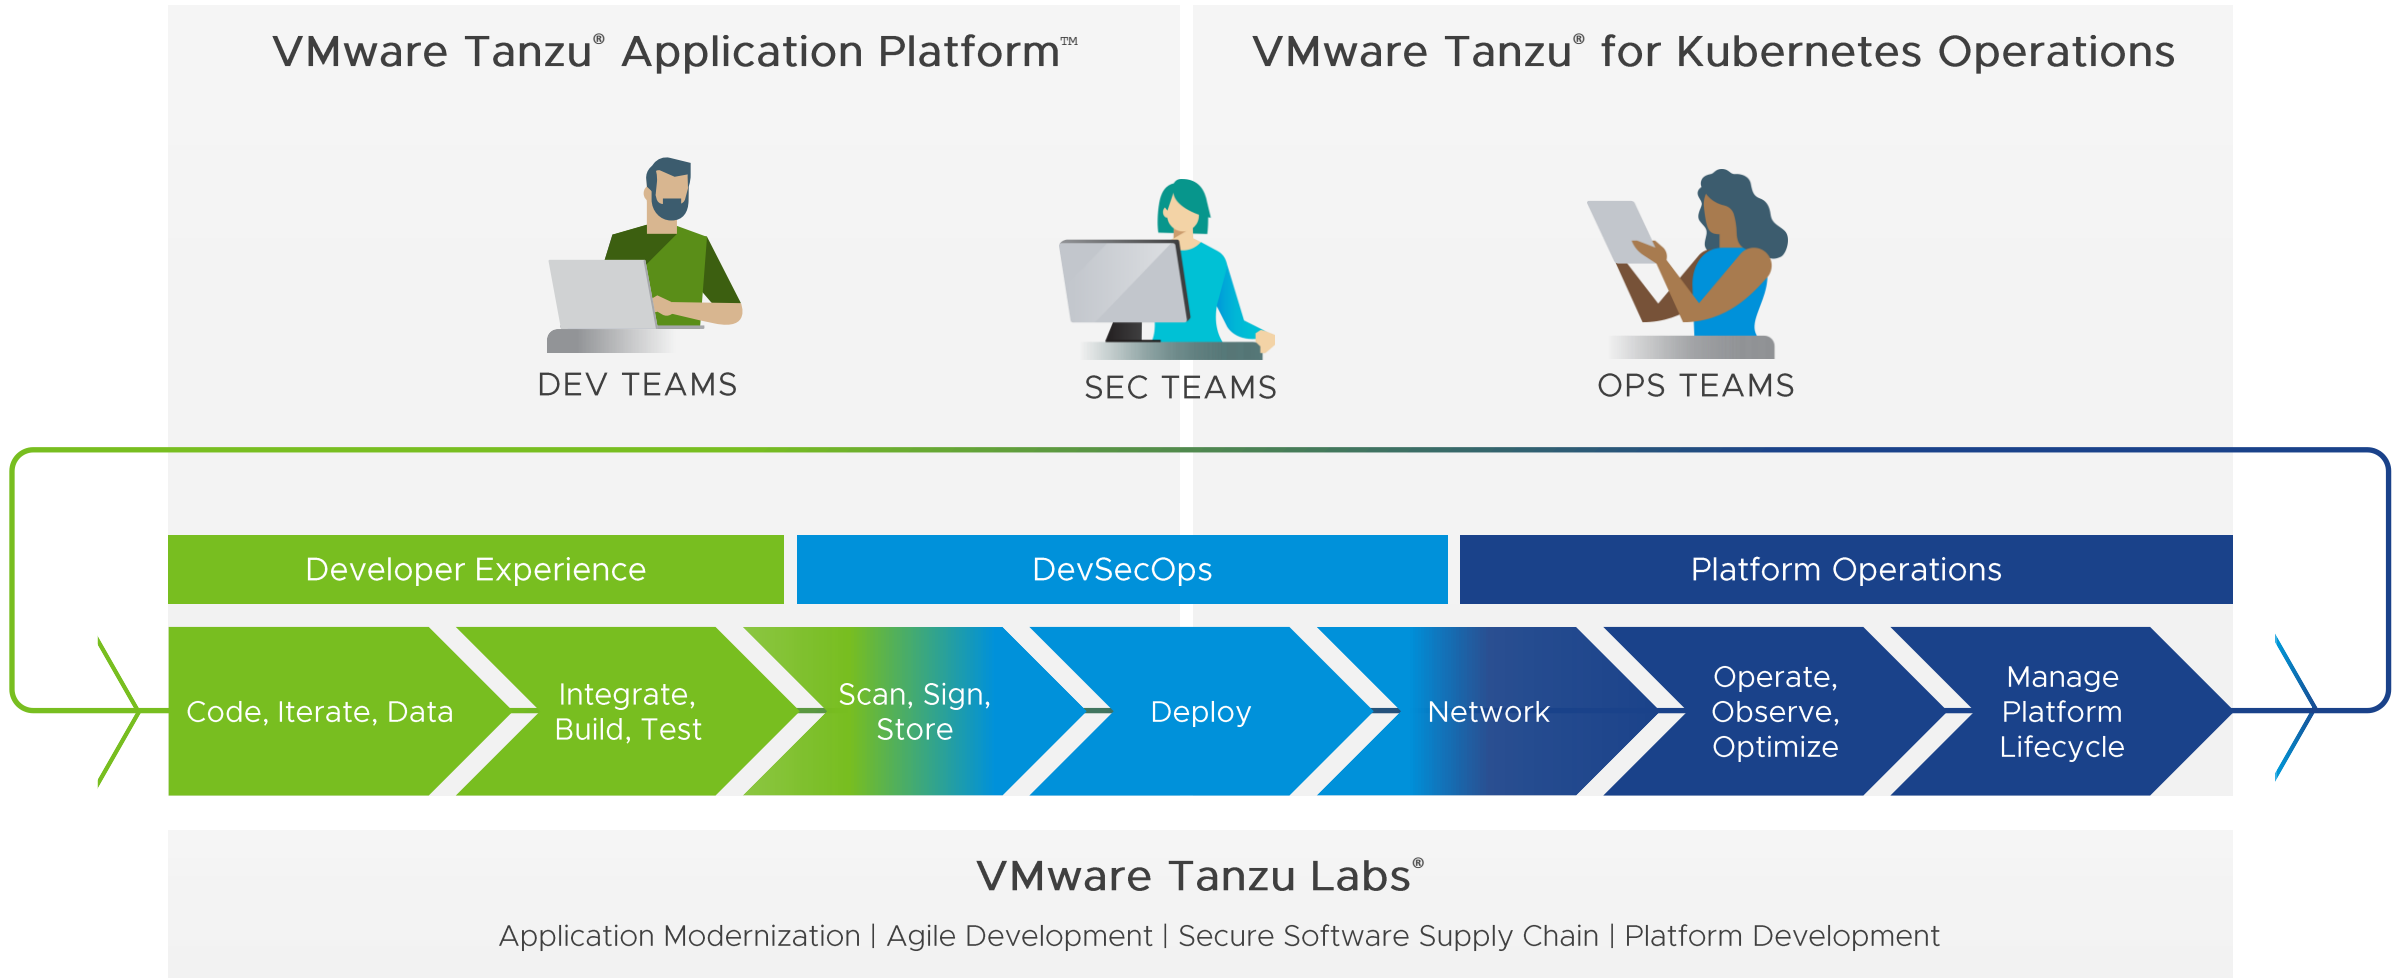

Provides a simplified, consistent approach to container deployment and management with tools, automation, and data-driven insights that boost developer productivity, secure applications and data, and optimize infrastructure performance

## VMware Tanzu<sup>®</sup> Labs and Partners

Cloud native consulting services for modernizing, building and managing apps

# How to Become Great at Modern Software

An end-to-end story

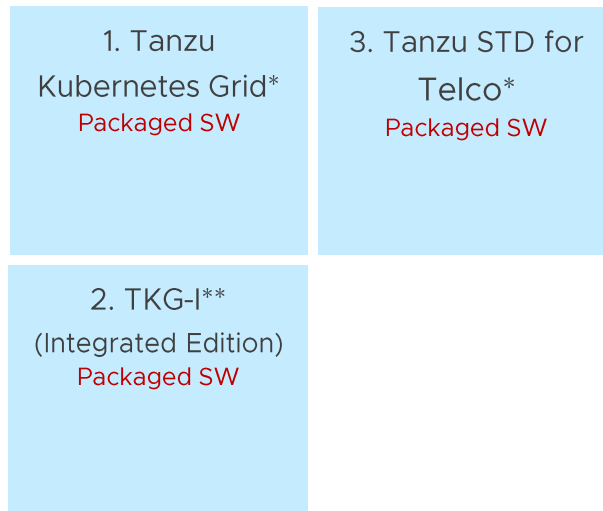

# Tanzu Kubernetes Platform

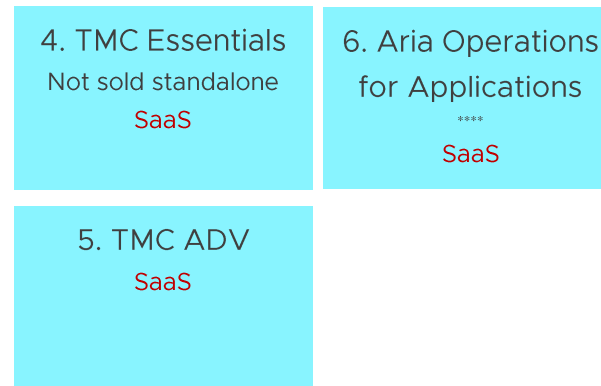

# Tanzu Kubernetes Portfolio

## Portfolio Overview – after May 5th

### Runtimes

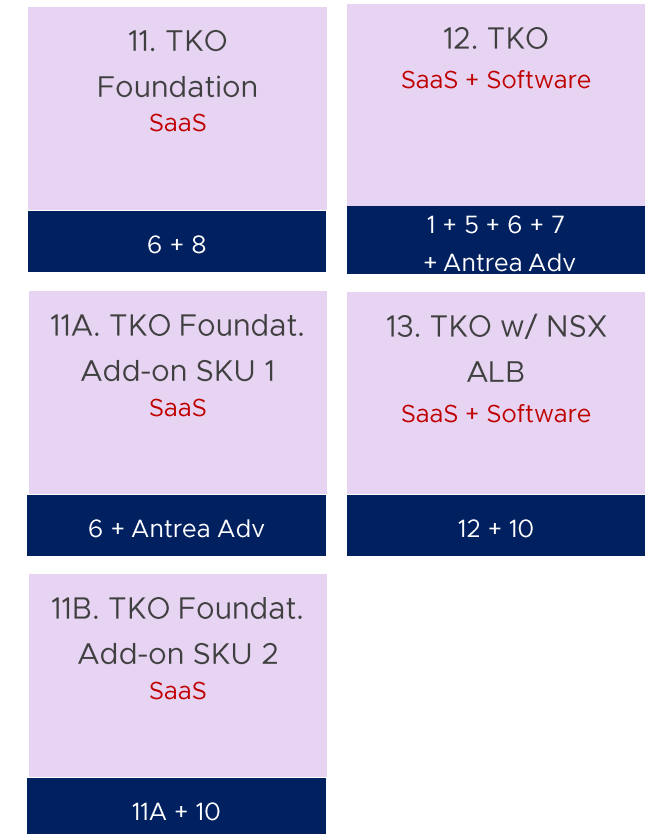

### Management & Observability

### Networking & Security\*\*\*

### Bundles

\* K8s Runtimes

\*\* BOSH based Runtime. Includes NSX

\*\*\* R&D in NSBU, GTM tied to Tanzu

\*\*\*\* Former Tanzu Observability

# Tanzu Kubernetes Grid Components

Run enterprise-grade Kubernetes across multiple clouds

COMPONENTS	TANZU STANDARD RUNTIME
vSphere capabilities	vSphere Pod service*, Storage service, Network service, Registry service*, VM service
Kubernetes cluster lifecycle management	Cluster API
Image registry	Harbor
Container networking	Antrea/Calico
Load balancing	NSX Advanced Load Balancer (Avi Essentials)
Ingress controller	Contour
Observability	Fluent Bit, Prometheus, Grafana for platform monitoring
Operating system	Photon OS, Ubuntu**, and Bring-your-own node image

# Tanzu Kubernetes Portfolio – Management & Observability

- Tanzu Mission Control
- Aria Operations for Applications (formerly Tanzu Observability)

# Tanzu Mission Control

Centralized multi-cluster provisioning, management, and governance

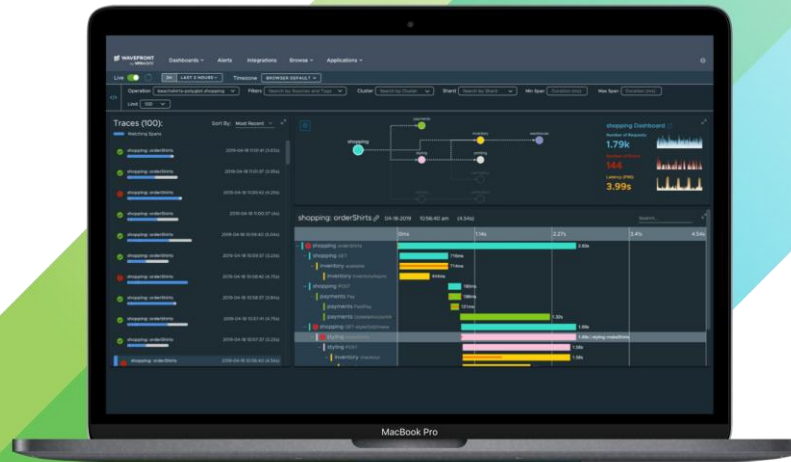

Tanzu Mission Control is a centralized management platform for operating and securing Kubernetes clusters and modern applications across teams and clouds.

# Aria Operations for Applications (formerly Tanzu Observability)

Delivers enterprise-grade observability and analytics at massive scale with granular controls. Allows you to roll out monitoring as a service to all your DevOps teams, including developers and SREs across the enterprise.

One window into the health of every app on any cloud for everyone.

Run great software with unified telemetry and immediate insights.

- ✓ Alert
- ✓ Troubleshoot
- ✓ Optimize
- ✓ Visualize
- ✓ Predict
- ✓ Automate
- ✓ Collaborate

# Tanzu for Kubernetes Operations (TKO)

- Tanzu Kubernetes Operations

# VMware Tanzu® for Kubernetes Operations

## The foundation for modern, multi-cloud container infrastructure

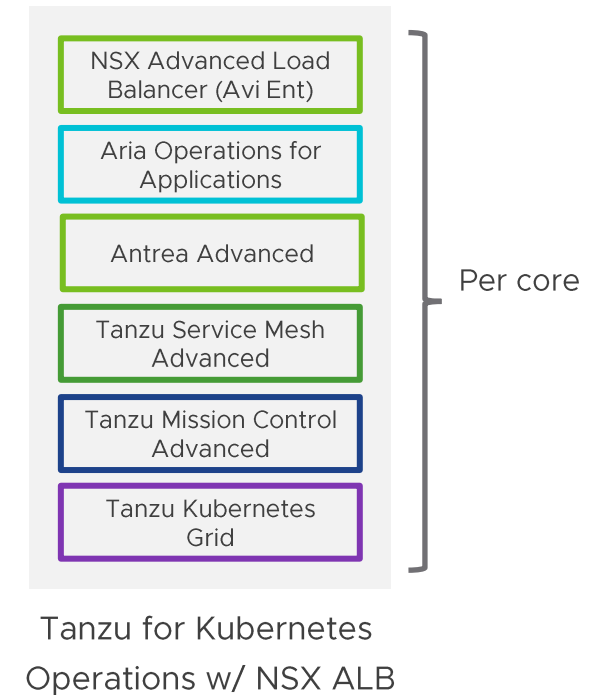

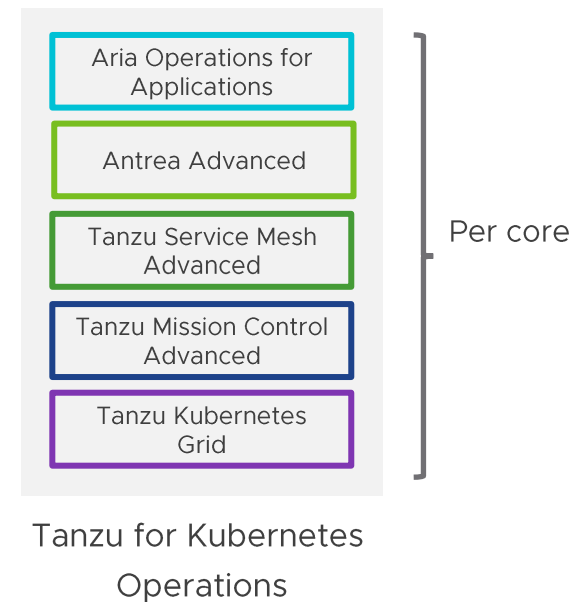

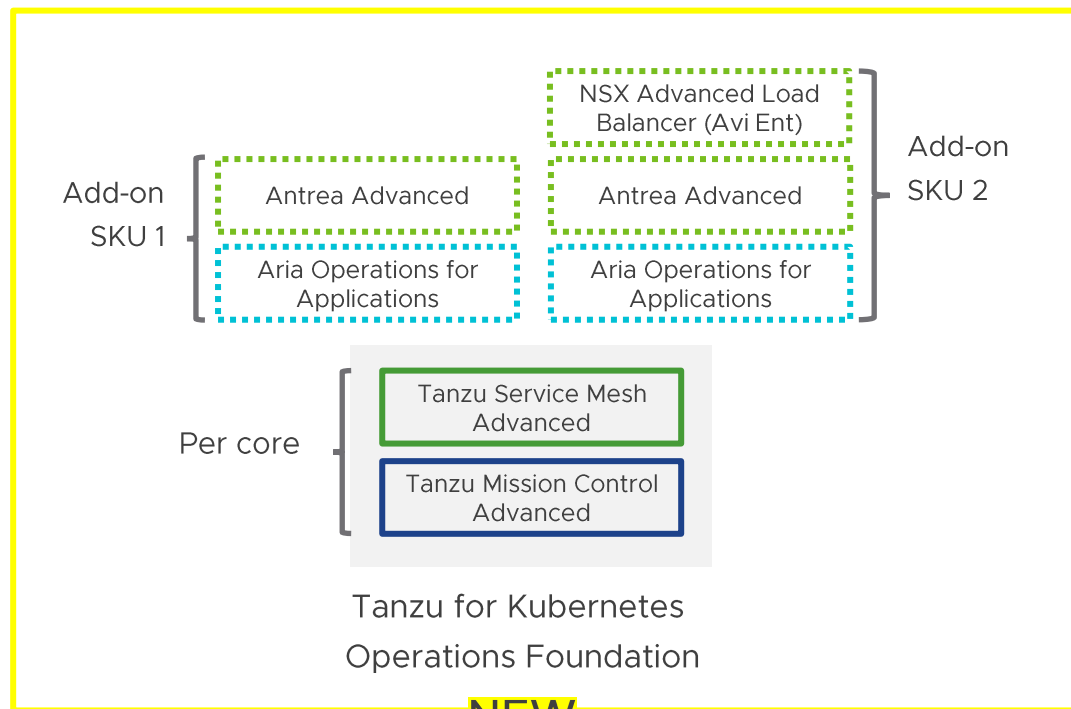

VMware Tanzu Labs™

Provides the expertise to build and run a consistent Kubernetes environment at scale for all containerized applications

# Tanzu for Kubernetes Operations

New SKU Offerings (as of May 11)

# Tanzu Developer and App Platform

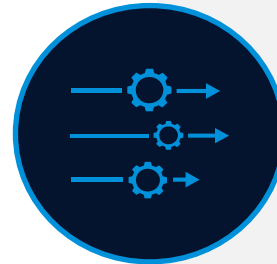

# Tanzu Application Platform

A modular, application-aware platform that runs on any compliant public cloud or on-premises Kubernetes cluster

It delivers a superior developer experience with a **pre-paved path to production** including all the needed components **pre-configured for developer** teams to build and deploy software quickly and securely.

Unlock developer productivity

Build rapid yet sustainable path to production

Coordinate the work of dev and ops

# Tanzu Application Service

Build better Software with Speed, Stability, Scalability and Security

Deploy new code thousands of times per month

Shorten the path to production so developers only need to push a button to deliver new innovations to customers.

Reliably run all your apps at cloud scale

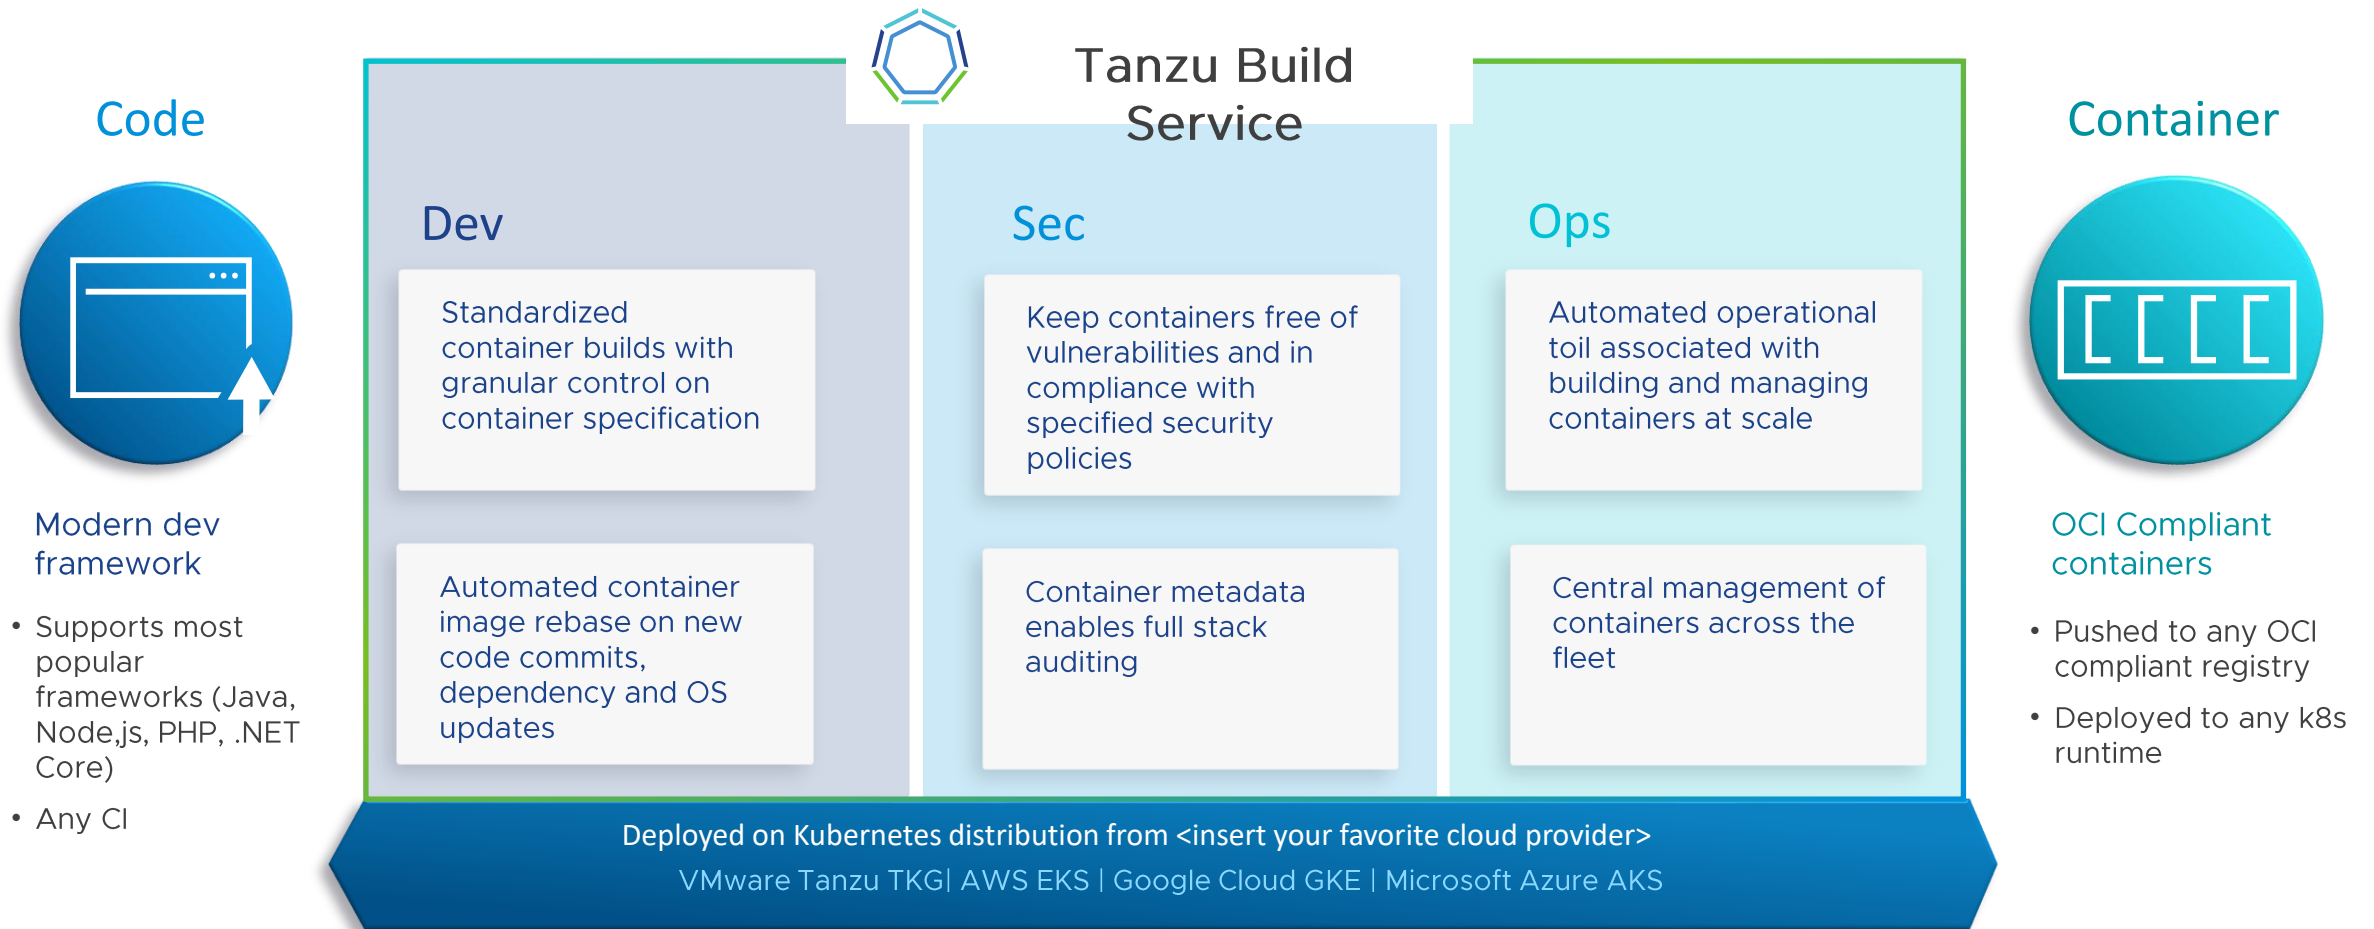

Efficiently manage Day 2 operations for high-velocity dev teams. Deliver superior uptime as your business grows.

Improve your security posture with automation

Quickly apply security patches and platform updates with zero downtime. Rotate credentials often and reduce risk.

# Tanzu Build Service Meets Customers Where They Are At

## Meets Customers Where They Are At

## Tanzu Data Services Portfolio

- Tanzu GemFire
- Tanzu SQL
- Tanzu RabbitMQ
- Tanzu Greenplum
- Tanzu Data Management

# Thank You
